

The Brain

Across

5. Using your body to make actions. This is controlled by your motor cortex. (8)
6. Control centre of your body, located in your head. (5)
8. Lobe at the back of the brain. The visual areas of the brain are mostly here. (9)
9. To wear on your bike to protect your head if you fall. (6)
10. Tasting, smelling, hearing, seeing. (6)
11. Lobe at the front of the brain. (7)

Down

1. Source of nutrients to give your brain energy. (4)
2. Insulates neurons and makes up about 60% of your brain. Also found in things like butter and bacon. (3)
3. Brain cell. They send messages to each other via electric currents and chemical signals. (6)
4. Half of the brain. The right side controls your movement on the left and the other way around. (10)
7. Each neuron makes 1000s of these with other neurons. (11)
10. Time at night when your brain sorts out and makes sense of what you have done and learnt that day. (5)
